3. Accessibility questions:

- What corrections did you have to make?

I made 11 times of adding alt text to the images.

- Do you think your website is usable if you turn off the CSS? Why or why not?

No. Since the major purpose of the website is to play music and the three buttons that handle this action are empty buttons that I was unable to fix.

However, other than that, I can navigate the website using either with a mouse or my keyboard, the images and contents were all correctly displayed when I turn off CSS.

- Is your site is tabbable? In other words, without the use of the mouse, are all the links and buttons accessible using the tab key?

Yes. It is tabbable. I can easily use tab key to select the buttons and links without a mouse.
